

# **Allegion Canada**

# Product Lead-Times Reference Guide: Updated April 16, 2025

#### How lead-times are calculated

Total order lead time represents the estimated time to enter, process, build, and ship a customer order to a 95% confidence level. The lead time is assigned to orders during order entry and is reflected in your acknowledgment as the 'ship date'. The term "Fast Track Program" represents items that are held in local inventory. Orders which contain only Fast Track items are dated at 5 business days from order acknowledgement. "Non-Fast Track" items are assigned lead times according to brand and product line and can be located using the Lead Time Reference Guide within this document\*.

### Fast Track Program Guidelines

Fast Track Delivery Program orders will be scheduled to ship within 5 business days of order acknowledgment issue date. Lead times on the order acknowledgment may be greater than 5 days depending on specific shipping day requirements. We will fill all orders on a "first-come-first-served" basis. Special program or initial promotional stock orders will receive factory leadtimes. If your requirement is greater than available stock, your acknowledgment will reflect the extended lead-time.

Purchase Order Acknowledgments and Scheduled Ship Date information are accessible via the Allegion Order Status Portal https://360portal.allegion.com/launchpad. If you have any questions regarding this message, please contact Allegion Customer Care at canada.customerservice@allegion.com or your Allegion Sales representative.

\*Note: For customers who are participating in a "fixed ship-day program" - the assigned delivery dates will vary to align with the pre-determined ship-day for your account.

### Commercial and Residential Hardware Products

Orders with quantities defined as a "Large Order" will require an updated lead time directly from Allegion.
