

# Mission-Critical Data Center Solutions

**Tailored security. Trusted solutions. Timeless protection.**

In the growing data center market, Allegion provides door, frame, and hardware solutions, enhancing security and innovation through tailored design-phase consulting, hardware specs, access control coordination, and key system implementation, ensuring robust protection and operational excellence.

## **Comprehensive Security Solutions**

Allegion offers industry-leading solutions from Schlage, Von Duprin, LCN, Steelcraft, and Krieger, featuring high-security key systems and specialized doors and frames to safeguard data centers.

## **National Team, Local Expertise**

Our national teams ensure consistent design and specifications, while local offices collaborate with contractors and partners to manage construction and provide seamless support during and after project completion.

## **Robust Dealer Network**

Allegion's extensive dealer network supplies and coordinates doors, frames, and hardware for new construction, with local and national partners providing reliable aftermarket support for your data center's needs.

## Empowering growth with strategic security and design partnerships

### Dedicated team from design to construction

Partnering with architects and consultants, we shape specifications to ensure secure, efficient, and sustainable data centers through prototyping and standards development. Allegion goes beyond products, offering long-term support from design to operations.

### National specification programs for consistency

Ensuring consistent specifications and coordination, we provide a single point of contact for owners and architects, addressing critical access control points early, reducing delays and improving project efficiency.

### Speed to build with prototyping and optimization

Supporting prototyping efforts, we help refine solutions before implementation. Minimizing risks, optimizing outcomes, and accelerating the construction process and speed to market.

### Smarter coordination with Overtur™

Simplifying collaboration, Overtur offers real-time data sharing, design tools, and project coordination, seamlessly integrating security design requirements with door hardware to save time and reduce errors.

### Comprehensive security and specialty solutions

Pioneering brands like Schlage, Von Duprin, LCN, and Krieger offer blast-resistant, SCIF, RF, and STC assemblies, designed to optimize your critical infrastructure.

### Reliable distribution and supply chain support

Driving timely product delivery during bidding and construction, our global, national, and local distribution network help reduce delays and keeps projects on schedule and on budget.

### Global influence with local expertise

Combining national reach with localized support, we provide strategic guidance and hands-on expertise, enhancing your market position and delivering tailored project assistance.

### Market Insights and Strategic Guidance

Drawing on deep data center expertise, we provide insights and guidance aligned with your business objectives, helping you navigate trends and maximize growth potential.
