OVERTUR™

One source of truth. Total operational confidence.

Gain Visibility. Improve Control. Reduce Surprises.

Why facilities teams choose Overtur

Managing doors, hardware, keys, inspections, and compliance records across one building or an entire campus can be challenging. Overtur™ centralizes critical opening information into a secure, cloud-based platform, giving facility teams real-time visibility and control over every opening throughout its lifecycle.

With Overtur, you can:

- **Know** what's installed at every opening
- **Manage** key systems with greater accountability
- **Streamline** inspections and field documentation
- **Maintain** accurate lifecycle readiness
- **Improve** compliance readiness
- **Reduce** downtime and costly work
- **Make** faster, more confident operational decisions

1 

VISIBILITY
Know what's installed and what's happening across every opening

2 

CONTROL
Manage security standards, keys, records, and authorizations from one platform

3 

COMPLIANCE
Maintain auditable records and documentation throughout the building lifecycle

4 

PREDICTABILITY
Reduce surprises with accurate, up-to-date opening information

Why Overtur

Key System Management

Benefits include:

- Real-time visibility into key bittings and cylinder data
- Faster access to key information
- Auditable tracking of key activity
- Improved keyholder management
- Enhanced oversight and compliance
- Greater control across facilities

Single Source of Truth for Every Opening

Access:

- Verify installations
- Perform inspections
- Manage punch lists
- Document deficiencies
- Capture notes & photos
- Collaborate in real time

Overtur™ OnSite Mobile App

Bring your facility data into the field and access & update opening information wherever work happens.

Field teams can:

- Perform inspections
- Document deficiencies
- Capture notes & photos
- Verify installations
- Manage punch lists
- Collaborate in real time

All information synchronizes directly to the Overtur platform, creating accurate records and improving communication between field and office teams.

Safety & Compliance

Overtur helps facility and security teams maintain safer, more compliant buildings by providing:

- Inspection documentation and reporting
- Historical records and audit trails
- Fire and egress inspection support
- Resolution tracking
- Real-time visibility into facility conditions
- Centralized security standards and documentation

Control your Facilities with Confidence

Overtur™ centralizes opening data into one secure source of truth, providing facility teams with the visibility, accountability, and control needed to operate smarter, safer, and more predictably. Learn more about Overtur and discover how connected opening data can improve your facility's operations.
