

B600 Series

Grade 1 Deadbolts

OVERVIEW

Schlage® commercial grade 1 deadbolts are designed for security, durability and beauty. Their sleek, broadly angled trim ring in a shallow, 7/8" depth is offered in 10 finishes. They feature a thick, anti-saw hardened steel bolt with anti-pry, anti-wrench and other protections to make it one tough lock. Optional single- or dual-sided lock status indicator trim features Schlage's patented 180-degree visibility. The large window size and red/white background messaging assures easy readability for even the color blind.

Previously known as separate B600, B700, and B800 Series depending on the associated key system level of security, the B600 Series now encompasses all Schlage key system offerings within the series. Like any other Schlage lock, B600 Series can be ordered configured for Conventional, SL, FSIC and SFIC formats in Everest, Everest 29, and Classic Obverse keyways. You can also order B600 Series for application of Primus and Primus UL 437 cylinders to achieve higher levels of administrative and physical security.
