Choose the Right Lock, at the Right Price, for the Right Application.

Whether you're building a new property or upgrading an existing one, the Schlage Performance Series mortise, cylindrical and tubular locks support a wide range of applications. Offering functions essential to retail, office, or multifamily properties, you can count on security, privacy, and cohesive style throughout the building.

	PM SERIES MORTISE	PC SERIES CYLINDRICAL	PT SERIES TUBULAR
 Offices	Main entrances, high-security areas, restrooms or mother's rooms with indication	Interior office doors or storage areas	Interior office doors or restrooms without security concerns
 Retail	Main entrances, high-value storage areas, or restrooms with indication	Backroom doors, offices, or storage areas	Suitable for fitting rooms or staff restrooms
 Multifamily or Condominiums	Main entry, unit entry or access control areas requiring monitoring or request-to-exit	Suitable for apartment entry doors, back of house doors, or leasing offices	Interior doors such as bathrooms, bedrooms, closets, or low security single offices

Other Buildings & Applications

- Distribution centers
- Warehouses
- Restaurants
- Nursing homes and assisted living
- Clinics and outpatient health
- Affordable housing and dormitories
- Religious buildings
- Hotels and lodging

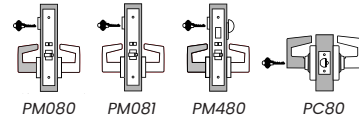

Performance Series Functions & Application

Functions & Application

4 Storeroom, keyed functions

Storeroom Lock: PM080, PC80
Accessible Storeroom Lock: PM081
Storeroom Lock with Deadbolt: PM480

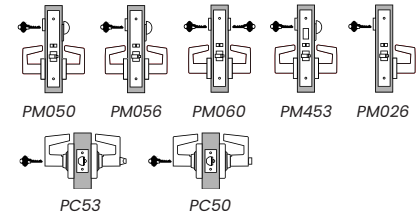

Used in secure storage, mechanical, and electrical rooms. Outside lever is locked at all times. A key is needed to open the door, and it locks again when the key is removed. There is no way to lock or unlock the door from the inside. Inside lever always free for immediate egress.

7 Entrance/office and exit, keyed functions

Entrance/Office Lock: PM050, PM056, PC50
Entrance Lock: PC53
Apartment Entrance Lock: PM060
Entrance/office lock with Deadbolt: PM453
Exit Lock with Cylinder: PM026

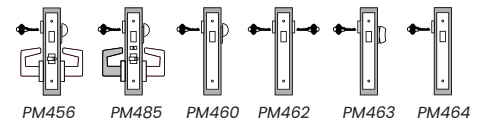

Both exit locks and entrance/office locks offer secure entry from the outside and free egress from the inside, ideal for areas needing security and convenience. Entrance/office locks have a key-operated exterior and an interior thumbturn or button, while mortise exit locks use a cylinder for exterior entry and an always-free inside lever, with an auxiliary latch for extra security.

6 Deadbolt, keyed functions

Corridor lock with Deadbolt: PM456
Faculty Restroom/Hotel lock with Deadbolt: PM485
Mortise Deadbolts: PM460, PM462, PM463, PM464

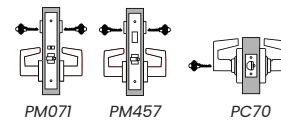

Deadbolts provide additional security are often installed on doors with push/pull hardware, such as restroom doors with multiple stalls, to allow locking when needed, like during plumbing issues.

3 Classroom, keyed functions

Classroom Security Lock: PM071
Classroom Security with Deadbolt: PM457
Classroom Lock: PC70

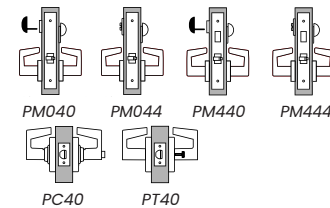

Classroom locks are controlled from the outside and are used where key control is needed without an interior thumbturn or button, such as in office corridors. Classroom security locks allow teachers to lock the door from the inside during emergencies, enhancing safety during lockdowns.

6 Privacy, non-keyed functions

Bath/Bedroom Privacy Lock: PM040, PC40, PT40
Privacy with Coin Turn Outside: PM044
Privacy with Deadbolt: PM440
Privacy with Deadbolt with Coin Turn Outside, PM444

Used for restrooms, bedrooms, or dressing rooms, these locks can be secured from the inside with a thumbturn or push button for privacy. They are usually unlocked from the outside with a tool instead of a key and may include an indicator to show whether they are locked or unlocked.

3 Passage, non-keyed functions

Passage Latch: PM010, PC10, PT10

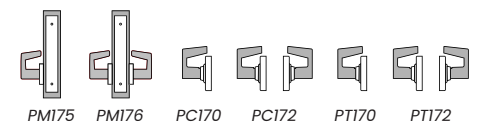

Passage latch locks are used for interior doors where locking is not essential. They are often found on closet doors, hallways, and common areas. These locks feature non-locking door hardware, allowing easy access through the door without the need for a key.

6 Dummy, non-keyed functions

Single Dummy Trim: PC170, PT170
Double Dummy Trim: PC172, PT172
Half Dummy with Lock Case: PM175
Full Dummy with Lock Case: PM176

Dummy functions are non-operational door hardware used for decorative purposes. Single dummies are on one side for doors like closets; double dummies appear on both sides for symmetry on double french doors. Half and full dummies with mortise cases mimic the look of mortise locks without functionality

3 Electrified functions

Lock/Unlock OS Lever, No Cylinder: PM090EL/EU
Lock/Unlock Both Levers, No Cylinder: PM091EL/EU
Lock/Unlock OS Lever, with Cylinder: PM092EL/EU

Electrified locksets in access control systems are either fail-safe or fail-secure. Fail-secure locks stay locked without power and unlock when powered, while fail-safe locks unlock when power is lost, useful in emergencies like fires. Both types can be controlled by card readers and always allow exit from the inside for safety.
