

-2

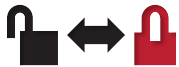

Double Cylinder

Overview

Schools, universities, hospitals and other facilities face unprecedented challenges and must maintain code compliance while hardening security. Von Duprin® has developed indication solutions that support this by allowing the user to remain on the secure side of the door and maintain free egress.

The -2 double cylinder has an interior key cylinder which locks or unlocks the trim from the interior side of the door. The accompanying directional indicator aids in operation. These options can be ordered as a new product or as a retrofit conversion kit for existing 98/99 Series exit devices.

Directional indicator

Features & Benefits

- ANSI BHMA Grade 1 & UL 10C Fire Rated
- Designed with reliability and durability in mind for high use and abuse environments
- Modular conversion kits available for quickly upgrading existing devices
- Enables user to quickly determine the status of the opening while remaining on the interior/secure side
- Pad printed icons provide a clear direction of rotation to secure opening
- Maintains free egress as required by code while still securing the door for lockdown
- Available for thumbturn or key cylinder
- Available for 98/99 Series rim, mortise, surface vertical, concealed vertical rod and cable devices

Specifications

Compatibility, Requirements & Considerations	
Series compatibility	Mechanical 98/99 with 996 trim
Device type	R, CVC, CVR, SV, M, XP
Rating	Fire exit hardware and panic hardware
Compatible trim functions	L or L-BE functions with 996 trim
Indicator features	<ul style="list-style-type: none"> ✘ Status indicator ✔ Directional indicator ✔ Change state of door from interior¹
Cylinder	Schlage rim cylinders 20-021 (keyed), XB11-979 and XB13-379 (thumbturns) are recommended
Device restrictions	Not available for XP98/9998, 98/9952, or 98/9950WDC devices ²
Retrofits existing devices for field upgrade:	Yes - Kit available

How to Order

1. Suffix: -2 double cylinder.
2. Specify device type, available with L and L-BE functions.
3. Specify handing and finish.

Please note: Cylinders are sold separately.

¹Interrupts power to QEL.

²WARNING: Double cylinder options (2/2SI) are ideal for fire exit hardware and panic hardware that is not equipped with the dogging feature. **Combining a double cylinder option with the dogging feature is not recommended**, as the hardware could be in the dogged (unlatched) position when the indicator states a locked position.
